

Seed Sleuth

Fill out the following chart based on the comparison of seeds in front of you

1. Place each of the following veggies with their corresponding relatives: pumpkin, pepper, beet, edamame, broccoli
2. Draw a picture of the seeds in this family
3. Describe the seeds in this family include size, shape, color and other characteristics that distinguish it from the other seeds

Veggie name	Relative of	Seed Picture	Seed Description
Chard			
Scarlet Runner Bean			
Cucumber			
Tomato			
Kale			

What other parts of a plant could help identify which family a plant belongs in?

The process of grouping plants or animals of the same family is called taxonomy.
